Hi Guys,

Can we add this item to the agenda for the next meeting in September please?

Suggestion for creating a one way system at the junction of Fore Street and Tristford Road to remove the blind turning out of Tristford Road and make that one way up as far as the cross roads with Fore Street and make the turning down into Fore St one way going down to the bus stop.

This would make the sight lines better, currently coming out of Tristford Rd you have to rely on hearing traffic coming around the blind bend, also when it is icy this is a dangerous junction as it is possible to slid out into the path of cars. The turning onto the bottom road is easier because of the big splay by the bus stop and cars could still park on that bit of the road as they do at present.

This could this perhaps be a TAP fund application?

Pictures attached

Regards

Nick
